

Give Your Lawn the Edge.

The Rocket Edge!

Create a dynamic transition between your lawn and garden with Rocket Lawn Edgers and spend your time enjoying the garden instead of weeding it. Rockets provide a level mowing strip that ends the need for regular edging with a weedeater. Even better, Rockets create a barrier to weeds and grass in your flower beds.

EASY TO INSTALL

Lay out the shape of the border you want to create between your lawn and garden. A garden hose works great to help design curves. Measure the length of the border. Dig out the soil along the length of the border. Insert your Rocket Lawn Edgers and adjust the shape as you go. That's it!

MOW OVER THE EDGE

Rockets make mowing your lawn that much easier. Using the installed Rockets as your guide, run your mower over the edge of your lawn. No more *edging* means you can put your weed eater into storage. Permanently.

LOOKS GREAT

Be the envy of your neighbours when you add Rockets to the edge of your gardens, around the base of a tree, or even outlining a garden patio. Rockets help you create and maintain the garden you've always wanted.
